|---|------------------------------|----------------------------|
| 100 L TANK CAPACITY | 8 bar MAX PRESSURE | 10 m HOSE LENGTH |
| Painted carbon steel CARBON STEEL | 29.5 kg NET WEIGHT | PED 2014/68/EU |

KEY BENEFITS

| | |
|--|---|
| Professional Spray Application Designed for uniform spraying in professional cleaning and spraying applications. | |
| Pneumatic Operation Compressed-air operation and a 10 m hose support efficient work around vehicles, equipment and work areas. No continuous connection to the compressed air supply required. | Robust Painted Steel Tank Painted carbon steel tank with automatic level indicator for practical professional use. |
| Ready-to-use Spray Set Supplied with LC-2 stainless steel lance, spray nozzle, nozzle protection and 10 m hose. | Made in Italy & PED Compliance Made in Italy in compliance with PED 2014/68/EU under TÜV Austria Italia surveillance. |

TECHNICAL DATA

| Feature | NBZ100 |
|-------------------------|----------------------|
| HS Code | 8424.30.10 |
| Material | Painted carbon steel |
| Operation | Pneumatic |
| Capacity | 100 litres |
| Maximum liquid capacity | 76 litres |
| Spray lance length | 750 mm |
| Hose length | 10 m |
| Max pressure | 8 bar |
| Net Weight | 29.5 kg |
| Gross Weight | 33.5 kg |
| Packing Dimensions | 51 × 57 × H110 cm |

STANDARD EQUIPMENT

- 10 m hose
- LC-2 stainless steel lance
- Spray nozzle
- Nozzle protection

- Tank with automatic level indicator
- Safety valve set at 8 bar

Optional Accessories

The NBZ100 can be configured with interchangeable nozzles for different spraying applications.

| | |
|---|---|
|  <p>Interchangeable Spray Nozzle Set</p> <p>Interchangeable spray nozzles available in different diameters for different spray angles and flow rates.</p> |  <p>Plastic, Brass and Stainless Steel Nozzles</p> <p>Available in plastic, brass and stainless steel according to the application and chemical compatibility requirements.</p> |
|---|---|

Other accessories and spare parts available upon request.

OPERATION

Fill the tank with liquid to approximately three quarters of its capacity and charge it with compressed air up to a maximum pressure of 8 bar. Always check detergent compatibility with the sprayer components before use.

SAFETY

Do not use solvents, explosive or corrosive liquids. Only liquids with a flash point above 65 °C may be used.

COMPLIANCE & ORIGIN

Manufactured in Italy in compliance with the Pressure Equipment Directive (PED) 2014/68/EU. The equipment is manufactured under the surveillance of TÜV Austria Italia in accordance with Accredia requirements.
