

Professional pneumatic sprayer

High-quality 24 litre pneumatic sprayer for professional cleaning and industrial applications.

Typical Applications Industrial Cleaning • Vehicle Wash • Workshops • Agriculture • Construction Equipment • Fleet Cleaning

NBZ25

24 litre painted steel pneumatic sprayer - PED 2014/68/EU

A professional pneumatic sprayer for uniform detergent application. Fill to approximately three quarters of tank capacity and charge with compressed air up to 8 bar.

Use note: Always check detergent compatibility with the sprayer components before use.

24 L TANK CAPACITY	8 bar MAX PRESSURE	10 m HOSE LENGTH
Painted carbon steel CARBON STEEL	11.3 kg NET WEIGHT	PED 2014/68/EU

KEY BENEFITS

Professional Spray Application Designed for uniform spraying in professional cleaning and spraying applications.	
Pneumatic Operation Compressed-air operation and a 10 m hose support efficient work around vehicles, equipment and work areas. No continuous connection to the compressed air supply required.	Robust Painted Steel Tank Painted carbon steel tank with automatic level indicator for practical professional use.
Ready-to-use Spray Set Supplied with LC-2 stainless steel lance, spray nozzle, nozzle protection and 10 m hose.	Made in Italy & PED Compliance Made in Italy in compliance with PED 2014/68/EU under TÜV Austria Italia surveillance.

TECHNICAL DATA

Feature	NBZ25
HS Code	8424.30.10
Material	Painted carbon steel
Operation	Pneumatic
Capacity	24 litres
Maximum liquid capacity	19 litres
Spray lance length	750 mm
Hose length	10 m
Max pressure	8 bar
Net Weight	11.3 kg
Gross Weight	12.3 kg
Packing Dimensions	29 × 36 × H81 cm

STANDARD EQUIPMENT

- 10 m hose
- LC-2 stainless steel lance
- Spray nozzle
- Nozzle protection

- Tank with automatic level indicator
- Safety valve set at 8 bar

Optional Accessories

The NBZ25 can be configured with interchangeable nozzles for different spraying applications.

 <p>Interchangeable Spray Nozzle Set</p> <p>Interchangeable spray nozzles available in different diameters for different spray angles and flow rates.</p>	 <p>Plastic, Brass and Stainless Steel Nozzles</p> <p>Available in plastic, brass and stainless steel according to the application and chemical compatibility requirements.</p>
---	---

Other accessories and spare parts available upon request.

OPERATION

Fill the tank with liquid to approximately three quarters of its capacity and charge it with compressed air up to a maximum pressure of 8 bar. Always check detergent compatibility with the sprayer components before use.

SAFETY

Do not use solvents, explosive or corrosive liquids. Only liquids with a flash point above 65 °C may be used.

COMPLIANCE & ORIGIN

Manufactured in Italy in compliance with the Pressure Equipment Directive (PED) 2014/68/EU. The equipment is manufactured under the surveillance of TÜV Austria Italia in accordance with Accredia requirements.
