

Professional pneumatic sprayer

High-quality 50 litre pneumatic sprayer for professional cleaning and industrial applications.

Typical Applications Industrial Cleaning • Vehicle Wash • Workshops • Agriculture • Construction Equipment • Fleet Cleaning

NBZ50

50 litre painted steel pneumatic sprayer - PED 2014/68/EU

A professional pneumatic sprayer for uniform detergent application. Fill to approximately three quarters of tank capacity and charge with compressed air up to 8 bar.

Use note: Always check detergent compatibility with the sprayer components before use.

<p>50 L TANK CAPACITY</p>	<p>8 bar MAX PRESSURE</p>	<p>10 m HOSE LENGTH</p>
<p>Painted carbon steel CARBON STEEL</p>	<p>21.5 kg NET WEIGHT</p>	<p>PED 2014/68/EU</p>

KEY BENEFITS

<p>Professional Spray Application Designed for uniform spraying in professional cleaning and spraying applications.</p>	
<p>Pneumatic Operation Compressed-air operation and a 10 m hose support efficient work around vehicles, equipment and work areas. No continuous connection to the compressed air supply required.</p>	<p>Robust Painted Steel Tank Painted carbon steel tank with automatic level indicator for practical professional use.</p>
<p>Ready-to-use Spray Set Supplied with LC-2 stainless steel lance, spray nozzle, nozzle protection and 10 m hose.</p>	<p>Made in Italy & PED Compliance Made in Italy in compliance with PED 2014/68/EU under TÜV Austria Italia surveillance.</p>

TECHNICAL DATA

Feature	NBZ50
HS Code	8424.30.10
Material	Painted carbon steel
Operation	Pneumatic
Capacity	50 litres
Maximum liquid capacity	38 litres
Spray lance length	750 mm
Hose length	10 m
Max pressure	8 bar
Net Weight	21.5 kg
Gross Weight	23.1 kg
Packing Dimensions	40 × 42 × H107 cm

STANDARD EQUIPMENT

- 10 m hose
- LC-2 stainless steel lance
- Spray nozzle
- Nozzle protection

- Tank with automatic level indicator
- Safety valve set at 8 bar

Optional Accessories

The NBZ50 can be configured with interchangeable nozzles for different spraying applications.

 <p>Interchangeable Spray Nozzle Set</p> <p>Interchangeable spray nozzles available in different diameters for different spray angles and flow rates.</p>	 <p>Plastic, Brass and Stainless Steel Nozzles</p> <p>Available in plastic, brass and stainless steel according to the application and chemical compatibility requirements.</p>
---	---

Other accessories and spare parts available upon request.

OPERATION

Fill the tank with liquid to approximately three quarters of its capacity and charge it with compressed air up to a maximum pressure of 8 bar. Always check detergent compatibility with the sprayer components before use.

SAFETY

Do not use solvents, explosive or corrosive liquids. Only liquids with a flash point above 65 °C may be used.

COMPLIANCE & ORIGIN

Manufactured in Italy in compliance with the Pressure Equipment Directive (PED) 2014/68/EU. The equipment is manufactured under the surveillance of TÜV Austria Italia in accordance with Accredia requirements.
