

24 litres painted metal Sprayer - plastified inside PED 2014/68/UE

24 litres sprayer – painted metal with internally plasticized tank.
Pneumatic working.
Tank with automatic level indicator.

The difference compared to the traditional sprayer with metal interior, consists in the plasticizing of the inner surface of the tank which is so isolated from the chemical and is not affected by the chemical agents of the detergent thus avoiding Oxidation and formation of rust.

Plasticizing preserves the characteristics of the detergent that with a traditional sprayer can lose its peculiarities in the presence of oxidation and rust.
With hose 10 mt., stainless steel lance LC-2 with spray nozzle, nozzle protection and foam head.
Safety valve set at 8 bar.
These products are filled with the liquid about 3/4 of their ability and loaded of compressed air to max 8 bars.

IMPORTANT

Please check the compatibility of the detergent with the components of the sprayer. Always obtain the safety file of the detergents used.

Do not use

SOLVENTS, EXPLOSIVE OR CORROSIVE FLUIDS

This product falls under certain Community directives, so it is CE marked and has the "EC declaration of conformity" in the instruction manual accompanying the appliance. We make available for consultation Directives concerning this product : PED 2014/68/UE - MADE IN ITALY.

Features

Model	NBZ25EPI
Material	Painted metal - plastified inside
Working	Pneumatic
Capacity	24 litres
Maximum liquid capacity	19 litres
End nozzle lenght	750 mm
Output tube lenght	10 m
Max pressure	8 bar
Weight	11.5 kg
